MINN KOTA®

TERROVA™ - BOW MOUNT

Built with power and uncompromising strength. Easy-to-use handle and fallaway ramps. Balanced motor design allows easy stowing. Special master cut-off switch automatically turns power off when stowed. Waterproof, low-profile, electric steer foot pedal w/18' cord for precise control, less than 1° steering resolution. 2 steering options: heel/toe or left/right steering buttons. Includes rotary speed dial, AutoPilot on/off button and mom/con on toggle. Works in conjunction w/ CoPilot™ accessory. Digitally controlled AutoPilot™ delivers infinitely variable steering adjustments, smooth course corrections, tighter heading accuracy, ultimate boat-control advantage. CoPilot compatible. Universal Sonar 2 models available. Digital Maximizer™. Indestructible composite shaft. Cool quiet power. Weedless Wedge™ 2 prop. See following pages for i-Pilot & i-Pilot Link features.

MINN KOTA®

FORTREX - BOW MOUNT

Innovative Mono Arm design. Single hinge point has fewer moving parts than traditional scissors mount and has a rear pivot bearing that is 20x larger. Counter-Tension Stability (CTS) design features an integrated spring arm that applies force in both the stowed & deployed positions. Marine-grade anodized extruded aluminum structural beam design. All metal interfaces are isolated w/composite bushings. Side plates have replaceable nylon motor rest inserts. 7/16" diameter pivot pin. Extruded marine-grade aluminum bow plate. Removable Bow Guard 360°. Incorporates enhanced patented Lift-Assist design. Control box is a hybrid composite material improving impact resistance. Lighted directional indicator. Non-marring soft grip rope handle w/improved abrasion resistance. Integrated* bow mount stabilizer comes standard on all Fortrex except 80 lb. 45" models. Hand Control model utilizes the Tilt/Extend Tiller, which tilts (up to 45°) & extends (up to 6") to give you maximum control.

MINN KOTA® EDGE BOW-MOUNT

Cool quiet power. No-nonsense performance. Extruded upper arm made from Marine-grade anodized aluminum is built for years of trouble-free use. Redesigned motor head constructed of highly impact-resistant, hybrid composite material. Head integrates a high visibility directional indicator. Cable boot integrated into control box. NOTE: Hand Control Models: Tilt Twist Tiller™ multi-position handle provides natural OB convenience, quick access and instant response. Foot Control Models: Ultra-responsive foot pedal ergonomically designed for all-day comfort, easy-to-use, heel/toe action provides reliable, responsive cable steering control.

MINN KOTA® POWERDRIVE™ V2 - BOW MOUNT

Cool quiet power. Ergonomically designed foot pedal offers precise speed adjustment, right/left steering, momentary and constant On/Off, high IP68 waterproof rating and 18' cord. Deploy-assist lever puts user in motion quickly and easily and provides easy, secure stowing. AutoPilot™ gives unparalleled navigational control, patented compass keeps boat on course even in adverse weather. Indestructible composite shaft. Digital Maximizer™ delivers precise amount of power needed, extends battery life, reduces damaging heat, runs 5x longer on single charge. CoPilot™ handheld remote (Sold Separately) allows speed/steering control from anywhere on boat. See page 11 for i-Pilot features.

MINN KOTA®

RIPTIDE® SP - BOW MOUNT

Cool quiet power. Optimized saltwater performance. Reengineered electric steer control. Indestructible composite shaft. Deploy-assist lever provides quick motion, easy/secure stowing. CoPilot™ remote gives freedom to operate from anywhere on boat. Digital Maximizer™ controls draw of power at infinitely variable speeds, eliminates wasted energy, conserves battery power. Advanced Corrosion Protection: virtually impervious to rust - metals undergo rigid multi-step cleaning process before being anodized/coated with special zinc dichromate armor plating. All components are finished with 5-mil TGIC polyester, powder-coat paint. Fully encapsulated electronics form impregnable barrier against destructive effects of saltwater. Sacrificial anode protects motor from galvanic corrosion. Optional corded or wireless foot pedals offer side-to-side steering, momentary/constant on switch, speed control knob for precise adjustments and 18' cable with IP68-rated waterproof connector plug. Weedless Wedge™ 2 prop. See page 11 for i-Pilot features.

MINN KOTA®

RIPTIDE® ST - BOW MOUNT

Saltwater powerhouse. The easy-to-use handle and fallaway ramps on the stow/deploy mechanism lets you effortlessly move your motor in and out of the water. The balanced motor design makes stowing easy, and a special master cut-off switch automatically turns the power off when stowed. AutoPilot™: Digitally controlled. Gives unparalleled navigational control. The patented compass in AutoPilot™ keeps your boat traveling on course, even through heavy wind or chop. Standard CoPilot gives you control of speed, steering and On/Off controls, along with a high speed bypass control for instant full power. Composite shaft is impervious to the corrosive effects of saltwater. Will not break, kink or corrode. Maximizer technology controls the draw of power at variable speeds. Weedless Wedge™ 2 prop. Optional corded foot pedal available. See page 11 for i-Pilot features.

MINN KOTA®

RIPTIDE® SF - BOW MOUNT

Designed for professionals & saltwater guides. Ergonomic contoured tiller handle design incorporates both tilt and extension functions. 45° upward tilt. Handle extends 6". Cool, quiet power. Lift-Assist stow & deploy w/heavy-duty gas-charged spring, cuts weight of lifting motor 50%. Mounting system w/heavy-duty, saltwater-engineered, corrosion-resistant stainless steel spring; breaks away on impact from any direction, automatically resets itself and protects motor/bow from hidden obstacles, detaches for added convenience. Indestructible composite shaft. Weedless Wedge™ 2 prop. Digital Maximizer™ controls draw of power at infinitely variable speeds, eliminates wasted energy, conserves battery power. Advanced Corrosion Protection: virtually impervious to rust - metals undergo rigid multi-step cleaning process before being anodized/coated with special zinc dichromate armor plating. All components are finished with 5-mil TGIC polyester, powder-coat paint. Fully encapsulated electronics form impregnable barrier against destructive effects of saltwater. Sacrificial anode protects motor from galvanic corrosion.

**MINN KOTA®****RIPTIDE® SE - BOW-MOUNT**

Cool, quiet power. Ergonomically contoured Tilt/Extend Tiller handle can both tilt (up to 45°) & extend (up to 6") to fit any style of fishing, and it tilts downward for easy storage. A digital battery indicator is located right on the motor head. Extruded, anodized aluminum arm. Quick-Lock cam depth adjuster. Indestructible composite shaft flexes on impact & won't break, kink or corrode. Digital Maximizer™ controls draw of power at infinitely variable speeds, eliminates wasted energy, conserves battery power. Weedless Wedge™ 2 prop. Sacrificial anode protects motor from galvanic corrosion.

MINN KOTA®

TRAXXIS - TRANSOM MOUNT

Transom motor platform improves every functional aspect of the on-the-water experience. Motor deploys to 10 different positions. Easily accessible thumb release provides simple deploy operation. Ergonomic contoured tiller handle design incorporates both tilt and extension functions. 45° upward tilt. Handle extends 6". Quick-Lock cam design for depth adjustment. Steering tension/vertical stow collar improves steering tension & allows the motor to be stowed in a vertical position. Push-to-test battery meter integrated into head.

MINN KOTA®

VANTAGE® - TRANSOM MOUNT

Cool quiet power. 4.1 Steering: moving Tilt/Extend 45° changes lower unit full 180°, eliminates tiller interference with outboard or kicker motor. Power Trim: push of button raises or lowers motor to meet changing depth and fishing conditions. Power Stow and Deploy: automatically raises motor to stowed position. Tilt/Extend tiller extends 31" to give better control from inside back of boat, tilts up/down for greater comfort and steering control. Digital Maximizer™ delivers precise amount of power needed, extends battery life, reduces damaging heat, runs 5x longer on single charge. Breakaway mount automatically breaks away on impact, resets itself, protects motor from hidden hazards. Backroll instantly by lifting directional indicator, rotating 180° and setting back down. Indestructible composite shaft. Weedless Wedge™ 2 prop.

MINN KOTA® E-DRIVE ELECTRIC OUTBOARD MOTOR

For lakes with environmental or gasoline outboard restrictions. Quiet 2HP power plant moves full-size pontoon boat up to 5 mph. Efficient 48V system allows up to 2-hour run at 100% power on single charge. Ultra-responsive throttle lever has forward, neutral and reverse positions. Includes key lock-out and trim switch. Back-lit Realtime Digital Battery Gauge, gives instant reading of how many hours of runtime are left on battery, fuel gauge showing battery condition and throttle power level. Stainless steel prop. Built-in Digital Maximizer™ delivers precise amount of power needed, extends battery life, reduces damaging heat, runs 5x longer on single charge. Cable steering compatible, connects directly to boat's cable steer linkage. Dash-mounted tilt gauge gives instant readout of motor position. Mount includes power-tilt mechanism and built-in breakaway mount that protects boat from underwater collisions.

MINN KOTA® EM SERIES - ENGINE MOUNT

Cool quiet power. Composite bracket will not interfere with normal performance of outboard or I/O motor. Mounts on cavitation plate of OB or I/O lower unit. No stowing/deploying required. Completely out-of-sight. Keeps deck clear and recreational boats from looking like fishing boats. Once on plane, EM rides completely out of water. Control speed with 18' corded remote that can be mounted or handheld. Offers infinitely variable speed control in forward or reverse. Features neutral (off) detent positon. Motor can be steered using boat steering wheel or outboard tiller. Electronics are housed in fully waterproof control module mounted below deck. Electronics are sealed in marine-grade polyurethane for corrosion-proof protection. Extruded aluminum housing features specially designed fins that dissipate heat to keep things cool under high rpm use. Digital Maximizer™ delivers precise amount of power needed, extends battery life, reduces damaging heat, runs 5x longer on single charge. Weedless Wedge™ 2 prop.

MINN KOTA® i-PILOT®

Ergonomically redesigned remote. 20% larger LCD screen, high-visibility laser-etched buttons & an easy-access external battery compartment. Compact, watertight & easy to use, this remote gives you instant feedback on active functions, speed, prop on/off status, battery power & GPS signal strength. Record A Track - can record your track, then retrace the path automatically. Up to 6 different tracks can be stored & recalled. Spot Lock - works like an electronic anchor. Automatically corrects for wind, drift or waves. Recall feature allows you to return to a stored Spot-Lock location. Stores up to 6 locations. Advanced Auto Pilot - projects a series of waypoints based on motor position. Will maintain the boat's heading while compensating for wind, current & drift. Standard AutoPilot™ will remain as a function for unique situations. Cruise Control - uses GPS to maintain actual "on-the-water" MPH rather than trolling motor speed. CoPilot - Control speed, steering, prop on/off and high-speed bypass - our "legendary" CoPilot functions - from your i-Pilot remote. Free yourself from the foot pedal and fish from anywhere on the boat. Backlit for low light situations. Fully gasketed, water tight & floatable. Neck lanyard & carabiner included.

---------	---------	--------------------	--------

MINN KOTA® i-PILOT® LINK™

Utilizes GPS technology and Ethernet connectivity to enable communication & functionality between select Minn Kota motors, select Humminbird® fishfinders, and LakeMaster digital GPS maps. The ability to store & record location data on the fishfinder & the ability to have the trolling motor use that data for automatic navigation is something fisherman have been asking for. Unique Follow the Contour feature directs trolling motor to follow a specific depth contour that is displayed on the LakeMaster digital GPS map. The Go To feature steers the boat to specific locations such as waypoints, Spot-Locks and iTracks. These locations can be recorded either from the fishfinder or from the remote. Up to 2500 waypoints & Spot-Locks, and 50 iTrack locations can be stored in the fishfinder. Spot-Locks are locations that have been recorded & stored using the Spot-Lock feature in the iPilot Link remote or the Humminbird fishfinder. When activated, it works like an electronic anchor by keeping the boat within a 5' radius of the selected spot. iTracks are specific trolling motor paths (up to 2 miles in length) that have been recorded & stored so they can be retracked upon request. Classic functions of the original i-Pilot include Cruise Control, Advanced AutoPilot™ and CoPilot™. i-Pilot Link remote features a full-color graphic LCD screen to display

GPS signals, remote battery charge, prop status, current function & user menus. Remote also displays important data such as water depth & temperature. Most i-Pilot Link functions can be activated on the waterproof remote or with the Humminbird unit. Remote includes a rechargeable Li-ion battery. i-Pilot Link is compatible with Terrova™, PowerDrive™ V2, Riptide® ST and Riptide SP trolling motors and is exclusive for use with most Humminbird models that have Ethernet capabilities. Follow the Contour works exclusively with i-Pilot Link enabled LakeMaster digital GPS maps. Complete system includes new control head for the motor, a wireless remote & all necessary cables for installation. Includes lanyard & carabiner clip.

REPLACEMENT PROP SELECTION GUIDE

Minn Kota offers a wide range of replacement props to fit all existing and many discontinued models. The props include the nut attachment and can be installed in seconds.

WEEDLESS WEDGE™ PROPS

The only 100% fully weedless prop. Patented design pushes weeds away to conserve battery power. Easily moves through heavy vegetation or cover, even at slow speeds

WEEDLESS WEDGE

WEEDLESS WEDGE™ 2 PROPS

Exclusive prop is the only of its kind that is 100% weedless. Unique, patented design features swept-back and flared blades to "wedge" weeds away while conserving battery power. Moves through heavy vegetation, even at slow speeds.

POWER PROPS

Delivers extra power to push through heavy vegetation. Fits 3-1/4" & 3-5/8" diameters.

MOTORGUIDE®

TOUR SERIES - LOWRANCE® OPTIMIZED

Redesigned motors w/built-in Lowrance® sonar nose cone transducer & temperature sensor to optimize sonar performance. Built-in 83/200kHz Lowrance® transducer provides clear, clean signals at 200kHz and is easily adaptable to Humminbird®, Vexilar® and Garmin® units via the 7 pin Lowrance® Blue/Gray connector coming out of the Tour Series foot pedal. For Lowrance® users, the built-in transducer offer 83kHz operating advantages w/increased field-of-view & broadband capabilities when connected to Lowrance® broadband capable options. More accurate temperature readings because the housing exposes a greater surface area of the probe to ambient conditions. Hardware on Tour Series motors is better than ever. Pulleys beneath each pedal have been upgraded to cold hard stainless for increased strength, smoother operation and better compatibility with the higher grade stainless cables. Shaft bearings to reduce noise. Variable speed control knob features easier to read speed settings and is made of a durathane material that greatly improves impact resistance. Adapter Sold Separately. See Page 18.

Johnny Ray LLC
New Ideas for Better Fishing !!

JOHNNY RAY
SPEED REEDER
UNIVERSAL
TRANSOM MOUNTED
TRANSDUCER BRACKET

Eliminates your high speed depth sounder reading problems. Constructed of heavy 16 gauge T-304 Stainless Steel & assembled w/ stainless steel hardware. Designed & developed specifically to provide flawless depth finder reading at high speed or while cornering. Unique two-piece adjustable design provides an infinite number of settings to match your boat's transom angle & the water's surface. Keeps the transducer in clean (non-turbulent) water at speed or when cornering. "Kick-up" design protects your transducer from floating or hidden objects under water.

Order #	Mfg. #	Sugg. Ret.
5206891	JR-3	\$34.99

JOHNNY RAY
TRANSDUCER MOUNTING BRACKET

Designed to provide a solid, secure and easy way to mount the transducer of your electronic unit to the shaft of your trolling motor. Brackets offset the transducer to the side of the motor to protect it from damage. Also allows for easy cone angle adjustments to make the unit perform to its true potential. The brackets have the ability to convert any conventional electronic unit to a side-scanning unit by turning the transducer 90° to the lake bottom. Die-formed from .093 aircraft grade aluminum, anodized to eliminate electrical interference and include zinc-plated mounting hardware.

Model JR-1: Fits 1" dia. shaft: MotorGuide, Evinrude, Johnson, OMC.

Model JR-2: Fits: Minn Kota.

Marinco

MARINCO®
CONNECT PRO RECEPTACLE & PLUG

Receptacle: Universal design for 2 or 3-wire configuration 12, 24, 12/24, 24/36 or 36 volt systems. Watertight sealing cap. Corrosion-resistant, plated brass electrical components. Drain holes keep water away from electrical components. Perma-Lock™ screw terminals will not loosen under extreme hull vibration. Standard 1-1/8" dia. mounting hole. Easy to install, with supplied mounting plate for front panel installation, or locking ring for rear access installation. Accepts up to 8 ga. wire. Easily replaces other trolling motor plugs and receptacles.

Plug: O-ring seal for waterproof connections. Weather-resistant plug cover. Corrosion-resistant, plated brass electrical components. Accepts up to 8-ga. wire. Ergonomic contoured grip for easy hookup & ground blade alignment.

TROLLMASTER™ PRO 2 REMOTE THROTTLE

Remote throttle for gas-powered trolling motors w/digital display & 10-times the throttle adjustment of the original PRO model. Unique memory feature allows you to return to the previously calibrated trolling speed after being in the idle position without moving the control knob, simply use the idle/run selector switch. Redesigned flat control panel w/touch-button switches provides throttle control of an auxiliary outboard from anywhere in the boat. Allows a momentary burst of full throttle for correcting your heading quickly or jumping to a desired spot. Installs easily & will not interfere w/manual motor operation. Requires less than 2 amps for reduced battery load.
